

BECOME A CORPORATE MEMBER OF **SCR**P

Corporate membership with SCR gives you access to world-class knowledge and problem-solving tools to gain a competitive edge. As a risk manager, individual membership with SCR helps fulfil your intellectual and professional needs.

Together we overcome barriers and pursue socio-economic advancement.

THE SOCIETY OF CERTIFIED RISK PROFESSIONALS

Our Partners

The Society of Certified Risk Professionals (SCRIP) was registered in November 2017. SCRIP aims to equip professional risk managers with multidisciplinary knowledge and collaborative networks that can address social, economic and environmental risks for sustainable competitiveness.

SCRIP's vision is to improve lives by mitigating social, economic and environmental risks through innovation and culture.

RISQ™ Knowledgebase

Risk is dynamic and cuts across industries and disciplines. Keeping track of developments that have impact on organisation value chain can be challenging for risk managers. Technology disruptions, international trade, climate change, political shifts, regulatory cycles and social trends are just some of the developments that risk professionals need to keep abreast with. Having this information in one place avoids duplication of effort and increase risk managers' productivity.

Risk Innovation Framework™

Conventionally, risks are largely mitigated by building more rules, tightening controls and automating processes to reduce human intervention. Letting the computers carry out routines reduces fraud and error, allowing people to focus on development and growth. SCRIP introduces the Risk Innovation Framework where powerful innovation methodologies can be embedded into your organisation to spur development and growth to give you the competitive edge.

RICS™ Risk Innovation Case Studies

Risk-Innovation is a fairly new concept where mitigation priorities depend on facts and figures derived during risk identification and assessment phases. Process, technology and product barriers are systematically assessed before solutions are designed. In the sharing economy, knowledge breeds knowledge and cooperative strategies enhance competitiveness. Here we publish case studies on how local organisations apply innovation to overcome risks successfully. The best case studies will be selected for the Risk Best Practices™ Award.

CRA™ Certification Programme

The Certified Risk Analyst programme is a post-graduate professional accreditation programme where candidates undergo three certification examinations and active involvement in our workshops and labs. They will be guided by a multidisciplinary team of experts in risk, innovation and culture.

APQC Online Resources

Corporate members opting for Advocate and Innovator programmes will gain access to a world-class knowledgebase developed by the American Productivity and Quality Centre. It offers access to the world's largest online sources of best practices, benchmarks, case studies and 5000 pieces of unique content covering 60% of the Fortune 100 companies. It gives you knowledge to overcome risks quickly. Brought to you specially by SCRIP, these online resources is worth an entry cost of USD25,000 per annum to you.

Risk Quant Mill™

Organisations operate in a vastly dynamic and interrelated environment. Understanding causalities of events, their likelihood and the impact are crucial in decision making and allocation of resources. PESTEL causalities on stakeholders that changes policies, decisions and directions. Knowing which chain of events and picking out root causes require multidisciplinary competencies. RQM is a sweatshop where a group of experts from financial, scientific and regulatory leaders collaborate to help you measure your challenges and prioritise them.

Innovation RiskLab™

Problems cannot be solved by building more internal controls, procedures and automation only. Product, business model and process design need to be remodelled and streamlined to meet the dynamics of the market and social trends. IRL is an innovation lab where you collaborate with our qualified innovators using global best practices, TRIZ (Theory of Inventive Problem Solving) and Design Thinking.

Culture Sandbox™

Changes cannot be sustained without beliefs and principles that appeal to culture. Culture is the adoption of ideas as a 'way of life' for people in organisation, stakeholders and the market. Culture dictates social trends. Identifying risks and innovation without understanding culture do not effectively address risk. At our CS workshop, economists, scientists, visual communicators and talent experts collaborate to help you effect changes.

RBPT™ Risk Best Practices

At RBP, we engage with our corporate members, curate and tell the story on how they have overcome risks from the RICS™ module. These stories serve to inspire business leaders and the best among them will receive recognition at the National Risk Best Practices Award. Here, work of risk managers will be appreciated and awarded under 16 main categories.

Quarterly Emerging Risks LunchTalk

Every quarter, our corporate members send their C-Level Executives to our VIP lunch talks to share, express their views and engage with industry peers and regulators on emerging risks. Leaders will be invited to speak on emerging risks and their impact on economy and society.

SCRP has a threefold mission:

- adopting a more measurable and empirical method to identify and assess risks
- applying established innovation methods to overcome risks
- shifting organisational culture to THINK RISK.

One of SCRP's objectives is to promote ISO 31000 – Risk Management as a universal tool that can be applied across all disciplines including finance, engineering and regulatory processes. A universal approach to risk management smoothens implementation across different platforms, including other risk management models.

SCRP is a one-stop, multidisciplinary risk mitigation or treatment centre to overcome all types of risks for the protection and benefit of all Malaysians. SCRP assists industry, government, academia and the public in diagnosing, defining and solving problems that are beyond single sector, discipline or entity.

Terms & Conditions

- All membership applications are subject to approval by Committee of The Society of Certified Risk Professionals ("SCRIP")
- Each 'Advocate' and 'Innovator' corporate membership class gives ONE (1) access to APQC Online resources. This access must be logged in with an scrp.org.my email. Additional access shall cost RM3,000 per annum for each license. Corporate members can opt to sign up separately for the same benefit at USD25,000 per company.
- 'Innovator' corporate membership class includes two nominees for each membership; Principal and Associate. Principal nominee will have full access to all the benefits. Associate nominee shall have access to the SCRIP Risk Labs only, to assist Principal Nominee. Additional Associate Nominee with full benefits shall cost additional RM5,000 per membership per annum.
- Members agree to pay all registration and annual fees in full for its Membership Class prior to admission.
- The term of SCRIP membership is for one (1) year. Members can renew memberships for additional one (1) year periods.
- SCRIP shall send membership renewal notices to its Members at least sixty (60) days prior to the membership renewal date.
- Invoices shall be sent via email to the Member's email address provided on its Membership Application.
- Membership shall be renewed automatically for additional one (1) year periods subject to terms and conditions at the time of renewal unless members opt for change in membership class or termination in which case notification in writing is required within 30 days prior to the expiration date.
- SCRIP shall have the right to suspend participation, or cancel the membership, of Member if it (i) fails to pay its annual fees on time in accordance to the constitution, or (ii) violates any section of the constitution. No refunds of Membership fees or other payments will be given.
- A member consents to, agrees and accepts registration and processing of personal information by SCRIP in accordance with prevailing legislation and the membership terms and conditions.
- You grant SCRIP the right to use your organisation's name and logo on the SCRIP's website and on related marketing materials, solely to indicate your membership in SCRIP. You may use SCRIP's name and logo, in the format and with the notices provided or requested by SCRIP, solely to indicate your membership in SCRIP.
- The Committee of SCRIP reserves the right not to accept a membership application.
- SCRIP reserves the right to amend and/or change membership benefits giving members a minimum of one (1) months' notice where these changes involve the removal of a benefit. Where the benefit is additional or an upgrade changes can take place immediately.
